Core: SiS 5598 66Mhz **Memory:** 4MB SDR 66MHz 64bit
Year: 1997 **Bus:** Integrated **CPU socket:** 7 (Cyrix, K5, K6, Pentium)

This chipset was used on my old motherboard with socket 7. I was using AMD K6-2 200Mhz on it, but SiS video chip stopped working and mobo started acting weird, thtas why is lack of information here.
